Helping young people
experience the world of work

Competition 1: Product/App/Service

The Covid 19 outbreak has affected every generation in many different ways both positive and much less positive. Your challenge is to design a product, service or app that can solve or assist any part of what is happening during this pandemic.

Competition 2: Spoken Word Challenge

Using the activities on the additional sheets, you will create a spoken word piece (max. 4 minutes) to express how you feel about the current world we live in. It's about celebrating our experiences - both positive and negative. It could be about the future, all explored through writing and spoken word poetry.

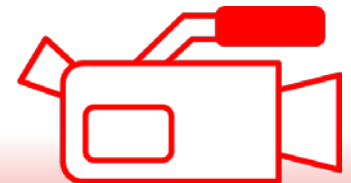

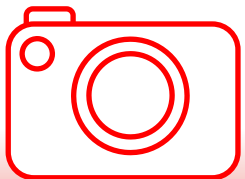

Competition 3: Inspiring Piece

We are looking for students to produce a short film, a piece of music, some form of artwork or a short story. The future, post pandemic is the theme for your inspiration. It might include priority Careers.

Bring your creativity to the fore.

A short description about your piece and your inspiration should be attached to your submission.

Competition 4: Compact Sport

Everyone is doing their best to follow the rules of lockdown but it is preventing many people from doing their regular form of exercise.

Your challenge is to come up with a new sport/fitness programme that can easily be performed at home. You will need to think about equipment, how players will compete within their homes and the space available to people.

Guidelines

These challenges have been designed to be completed under the current lockdown conditions of April 2020
Young people and their families are invited to take part in one or more of the themes.

A separate application form must be completed for each application submitted. Voucher prizes are available for all themes
